

## The Smart Choice for Enterprise Software

### Tax Management

---

**CityShare®** is a complete platform of easy to use suites and applications designed specifically for Local Government's unique budgeting, operating and financial requirements. Our intuitive enterprise level software is modular and fully integrated allowing users to start with a basic system while affording the flexibility to add scalable functionality and features as needs expand and grow more complex. **CityShare®** is developed using industry standard client server and web enabled architecture combined with enhanced collaboration tool sets that will satisfy your needs now and in the future. We know you need to do more with less – fewer resources - fewer keystrokes –faster results. This is why our products are designed to be the Smart Choice for Enterprise Software!

The **CityShare® Tax Management** suite is a complete and fully integrated solution that provides collection and reporting tools for real estate, personal property and per capita tax billing requirements. The suite uses county assessment information to either calculate the taxes directly or import a county-calculated value. The Tax Billing application provides the ability to calculate bills with discount, face and penalty or to set up payment plans. The software will post and track abatements, or exonerations of specific tax bills or revenue categories, either in full or as a portion of the total tax obligation. Multiple bill types and/or revenue categories may be set up for multi-jurisdictional collections. All applications utilize a consolidated database with a secure user login with access control, departmental reporting and electronic signoffs. The applications provide workflow controls to send notifications or emails to users based on predefined workflow events. Together the applications provide everything you need to deliver a more effective governmental accounting solution.

### Other Suites in the CityShare® Enterprise Solution

**Financial Management** is a complete and fully integrated multi fund accounting system for local government entities.

**Land Management** is a single tool for land use control and planning designed to manage all application, permit and violation documents featuring a centralized parcel database.

**Employee Management** provides all required functions of a complex Public Sector Payroll & Human Resources with integrated G/L & optional position control.

**Revenue Management** is a municipal billing and collection solution designed for local government utility operations that expedites bill processing, cash collection and control.

**Government Management** provides the ability to distribute key features of accounting control with departmental security through the organization in a controlled manner.

## Features & Benefits:

- An Enterprise Level Software package designed to support the rigorous demands of a Digital Government Platform – where you are today – and where you’re headed in the future.
- Regional and state specific applications
- Easy to use customer bill look up tools
- User defined set up tables make customization easy to accomplish
- Simplifies payment processing
- Significantly reduces work effort and key strokes while improving accuracy
- **Let’s Talk** – we have a well thought out list of features and benefits – you’ll be impressed!
